2. A reading of the material should convince all that this matter does go far beyond a local situation - even a [REDACTED] situation. It transcends Physical Security.

3. I suggest a study is in order - perhaps by the Executive Staff - to review the problem in greater detail and make whatever recommendations may be appropriate to the Director of Security. Would envision IOS' participation will be needed to explore various areas.

4. We have not answered to the OTR/SO to date.
